## DEDICATED SERVER - REGEN L1

A server designed for environments that require speed and consistency

### The true logic of sustainable Premium performance

The **REGEN L1** is based on hardware that has been tested and selected to meet the needs of infrastructure where **responsiveness** makes all the difference. It stands out for its excellent performance, particularly suited to professional uses that require **speed of execution, fluidity** and **stability** over time.

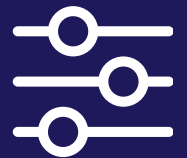

**Designed for applications where response times are critical**, it is a relevant choice for virtualization with **high performance requirements** per core, an internal technical platform, or business environments that require a high level of responsiveness on a daily basis.

By giving high-end professional hardware a second life, the **REGEN L1** is fully in line with a **Circular IT** approach aimed at reducing the use of new equipment and supporting your sustainability commitments.

## A RE-ENGINEERED AND CUSTOMIZABLE SERVER

Several options are available

### Optimize the REGEN L1 to suit your needs!

The **REGEN L1** has been designed to **adapt to your needs**, both in terms of **power and storage capacity**.

Several options allow you to configure the **REGEN L1** to meet your every need:

- a RAM option to support the increased load of your applications,
- hotplug storage allowing you to add NVMe storage quickly and easily according to your needs,
- several bandwidth options.

### CPU

- **2 x Intel® Xeon® Gold 6242R** - 20 cores / 40 threads
- Base frequency: 3.1 Ghz (turbo maxi : 4.1 GHz)
- Multithread scoring: 55 862 points

### RAM

- **128 GB DDR4 ECC REG**
- Option: 256 GB DDR4 ECC REG*

### HOTPLUG STORAGE

- **2 x 960 GB SSD NVMe** (available with or without software RAID)
- Options: max. 8 disks 960 GB SSD NVMe*

### NETWORK

- 2 x 1 Gbps ports
  - 2 x 10 Gbps ports
  - Dedicated port for KVM / IP
- Option: increased bandwidth (up to 5 Gbps)*

### OTHER INFORMATION

- Redundant Titanium 1100W hotplug power supply
- TPM 2.0 module (server hardware security)
