

Power L3

The professional range

PERFORMANCE & SCALABILITY

The **POWER L3** is powered by an **Intel® Xeon®** processor, DDR5 ECC Registered memory, and Datacenter NVMe storage to deliver power, stability, and flexibility.

Designed for demanding production environments, it guarantees high performance and strong scalability.

USE CASES

A platform designed for **demanding production environments**, combining performance, availability, and scalability.

Production
Full-services
Virtualization
Databases
High availability

FOR WHOM ?

IT & production

Reliability and risk management

Ideal for managing critical infrastructure that requires performance, stability, and high availability.

Full-services

Density and scalability

Designed to host multiple services and virtual machines with high-performance, scalable resources.

Growing companies

Absorption capacity

Designed to support the scaling of applications and ensure consistent performance over time.

TECHNICAL SPECIFICATIONS

Standard configuration

CPU

Intel® Xeon® 6517P - 16 cores / 32 threads
Base frequency: 3.2 GHz (turbo maxi: 4,2 GHz)
Multithread scoring: 49 099 points

RAM

64 GB DDR5 ECC Reg

STORAGE

2 x 960 GB SSD NVMe (available with or without software RAID (except Windows), hardware RAID on quote)

NETWORK

Dual 1 Gbps ports
Dedicated port for KVM/IP

OTHER INFORMATION

860W Titanium redundant power supply
TPM 2.0 module (server hardware security)

Scalability and options

SCALABLE RAM

Up to 256 GB DDR5 ECC Reg online
and up to 2 TB DDR5 ECC Reg on quote

ADDITIONNAL STORAGE

Additional storage: up to 8 NVMe SSDs or up to 10 SATA SSDs, depending on the configuration selected

ADDITIONNAL CARDS

1 additional card possible, to choose from:
10 Gbps network card
Hardware RAID card (Levels 0/1/5/6 - on quote)*

*Note: Hardware RAID card requires additional S-ATA SSD disks.
